

Chip Wallace

Product Portfolio Director
J.D. Power

Chip Wallace is a Product Portfolio Director in the Autodata Solutions Division of J.D. Power. Chip oversees a suite of products that power vehicle merchandising tools and research experiences, including Automotive Description Service, As-Built Valuation Service and associated data products. Chip is a customer-focused product manager with a proven track record of success in launching new products and revitalizing mature products through effective collaboration with customers, sales, executive management, professional services, engineering and partners.

With over 15 years at Autodata Solutions, Chip has taken on a variety of roles within the organization from software development to client services to his current role. With this wide range of experience, Chip has the rare ability to provide insights from all stakeholders during the development of new products and solutions.
